

# HEPOL™

RESTORES LIVER HEALTH\*  
ENHANCED ENERGY AND ENDURANCE\*  
NATURAL DETOXIFIER\*

## Your Liver's Best Friend

Hepol™ - The health of your liver is vital to your overall health. The liver is the largest gland in the body. It helps generate digestive enzymes, converts fat into fuel, controls metabolism, regulates cholesterol in the blood stream and neutralizes toxins and waste products. A decrease in liver activity can lead to debilitating diseases.

To help support healthy liver function there is Hepol. Hepol is a proprietary blend that is marketed exclusively by ProJoba International. Hepol is a blend of a natural, organically grown pollen extract, essential enzymes, botanical Glutathione, SOD (Superoxide Dismutase) and Aloe Vera, which has been specifically formulated to cleanse and support healthy liver function.

Glutathione is one of the most powerful antioxidants available in the liver for detoxifying free radicals, toxic compounds and heavy metals. All of us come into contact with these pollutants / pesticides; many of us also take medications—we should all be regular users of Hepol.

## What Are Flower Pollen and Pollen Extracts?

Flower pollen is one of the most complex whole food-structures on this planet. The ingredients found in it are the building blocks of plant life and therefore also the first link in the human food chain. Pollen's biochemistry has been researched extensively. This research has identified over 3,000 different life enhancing substances in pollen, and pioneered the production of pollen extracts for the health conscious consumer worldwide. Pollen contains every micro-nutrient needed for the human body to thrive.\*

Hepol contains a pollen extract of guaranteed purity. All stages of production of this are to pharmaceutical standards, including: selection of seeds, cultivation of the plants, collection of the flowers for the derivation of pure pollen and the subsequent processing of the pollen extract.

## The Importance of Glutathione

Glutathione is a powerful antioxidant that is manufactured by your liver as a protective agent. It detoxifies many harmful compounds that are excreted in the bile. Some glutathione is released directly by the liver into the bloodstream where it helps to maintain the strength of your red blood cells and also helps protect your white blood cells.

Glutathione can also be found in the lungs and in your body's intestinal tract. It is required for carbohydrate metabolism. Glutathione also appears to have anti-aging effects by aiding in the breakdown of oxidized fats that may contribute to atherosclerosis. As we get older glutathione levels in the body get lower and this can accelerate the aging process.\*

## Suggested Use:

As a dietary supplement, adults take 2 to 4 tablets daily or more, as needed.

### Supplement Facts

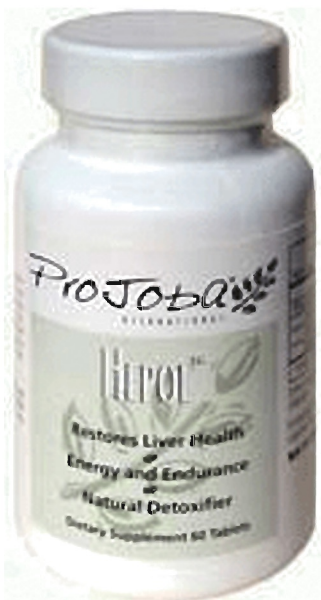

Serving Size: 2 Tablets      Servings Per Container: 30

Amount Per Serving    %DV

Proprietary Blend Containing: Glutathione Yeast Extract YH, Aloe Vera Extract, Superoxide Dismutase and Pollen Extract.	170 mg.	**
--	---------	----

\*\* Daily Values (DV) not established

Other ingredients: Microcrystalline Cellulose, Magnesium Stearate and Colloidal Silicon Dioxide.
